

## Alpha™ Health+ EP Fish Feed

Floating extruder feed developed to promote health and accelerate growth

**Alpha™ Health+ EP Fish Feed** contains essential nutrition to promote fish health and accelerate growth rate to achieve best possible FCR. The formula contains high quality marine based ingredients with the latest extrusion technology.

### Alpha™ Health+ EP Fish Feed

- ★ composes nutrition primarily from high quality fishmeal and marine based proteins which are abundant in essential fatty acid and amino acids.
- ★ high protein floating pellet provides the ease for feeding management
- ★ focuses in the nutrition assimilation and digestion to ensure maximum nutrition are utilized and efficiently turn into accelerated growth factor and result in optimal FCR
- ★ the undigested nutrients in feces is kept minimal to maintain water quality to reduce pollution and water exchange
- ★ superior digestion and result in more intact fish feces which symbolizes superior digestion and fish health. Perfect for closed system culture as water exchange is reduced
- ★ promote fish health and tolerance strength against density or disease/pathogenic stress
- ★ vengineered by reduced starch in formula to allow inclusion of more utilizable ingredients in formula

### Applicable Species

Grouper, Flounder, Seabass, Seabream, Snapper, Pompano, Cobia and high value marine fish species or freshwater species affordable in nursery stage
